
SonarScope

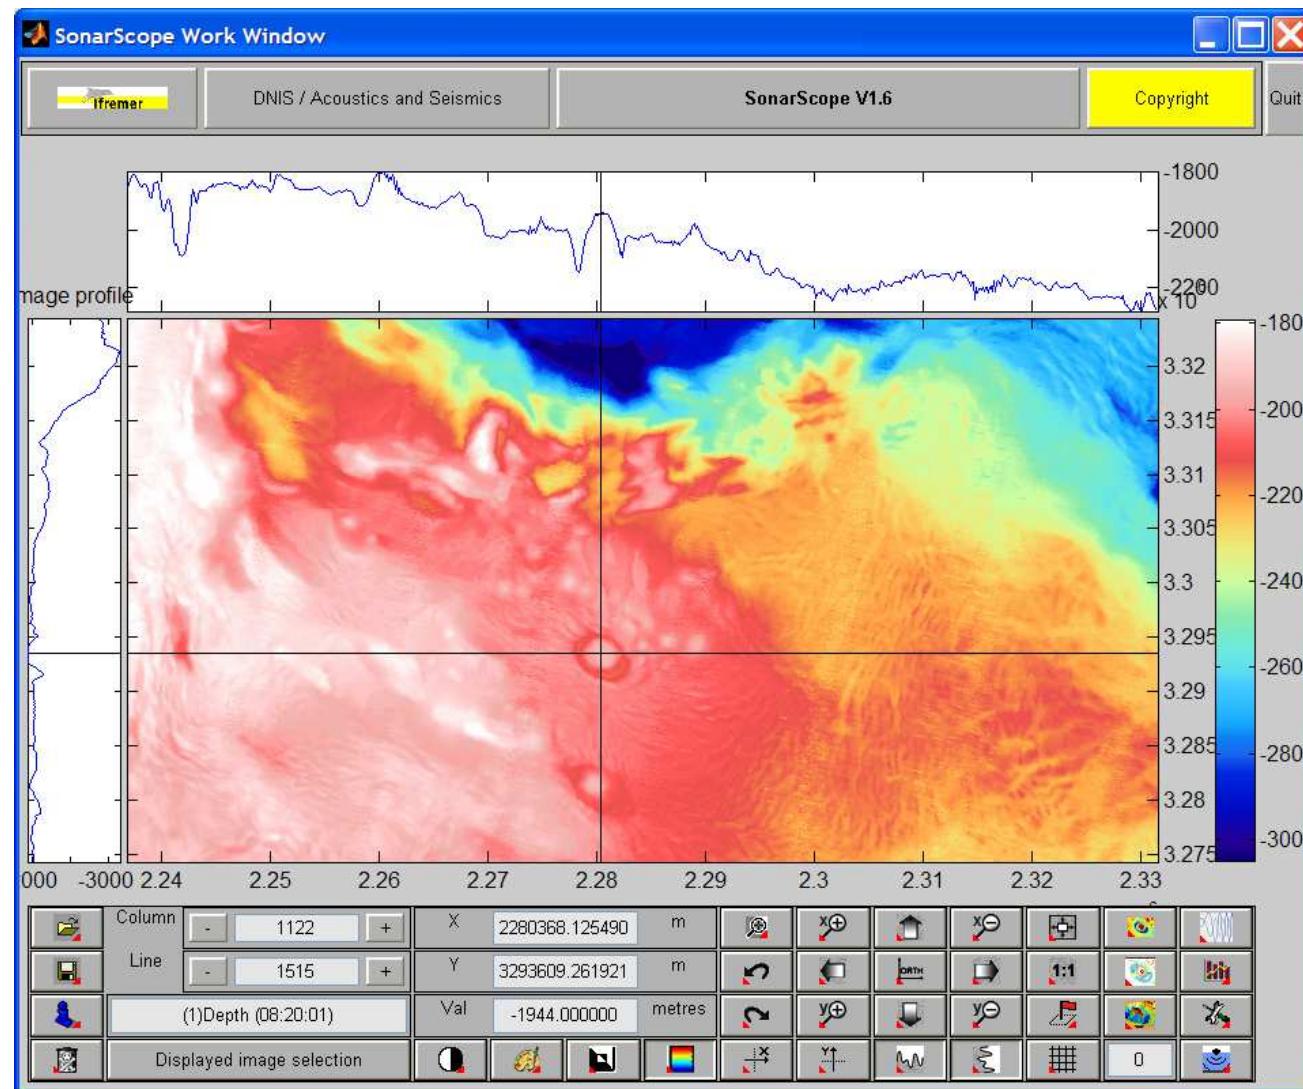

Overview

Jean-Marie Augustin

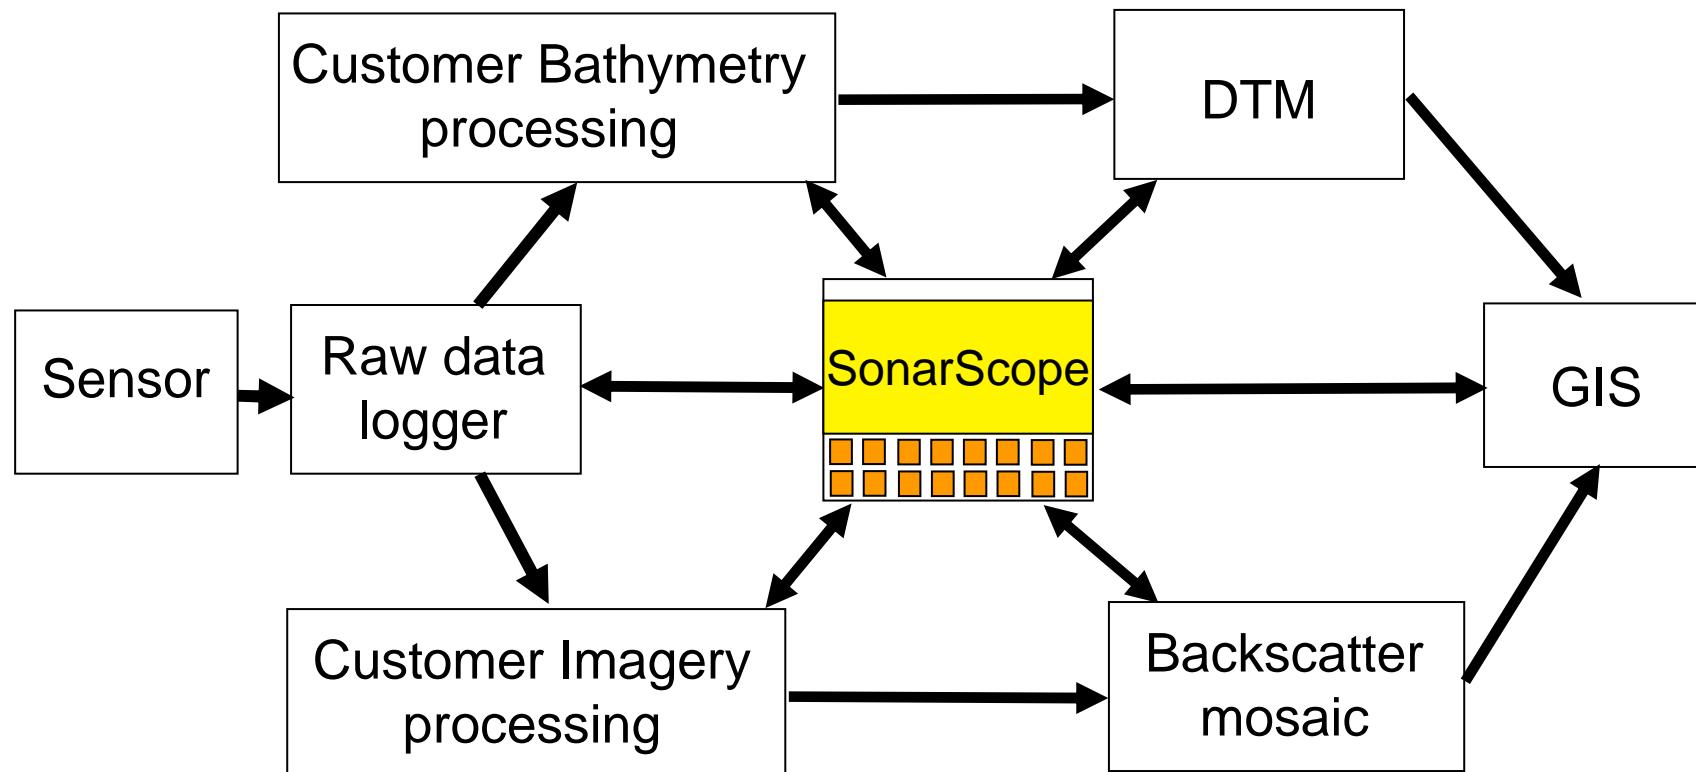

Ifremer, Brest, France

Acoustics & Seismics Dept

SonarScope : The sonar « photoshop »

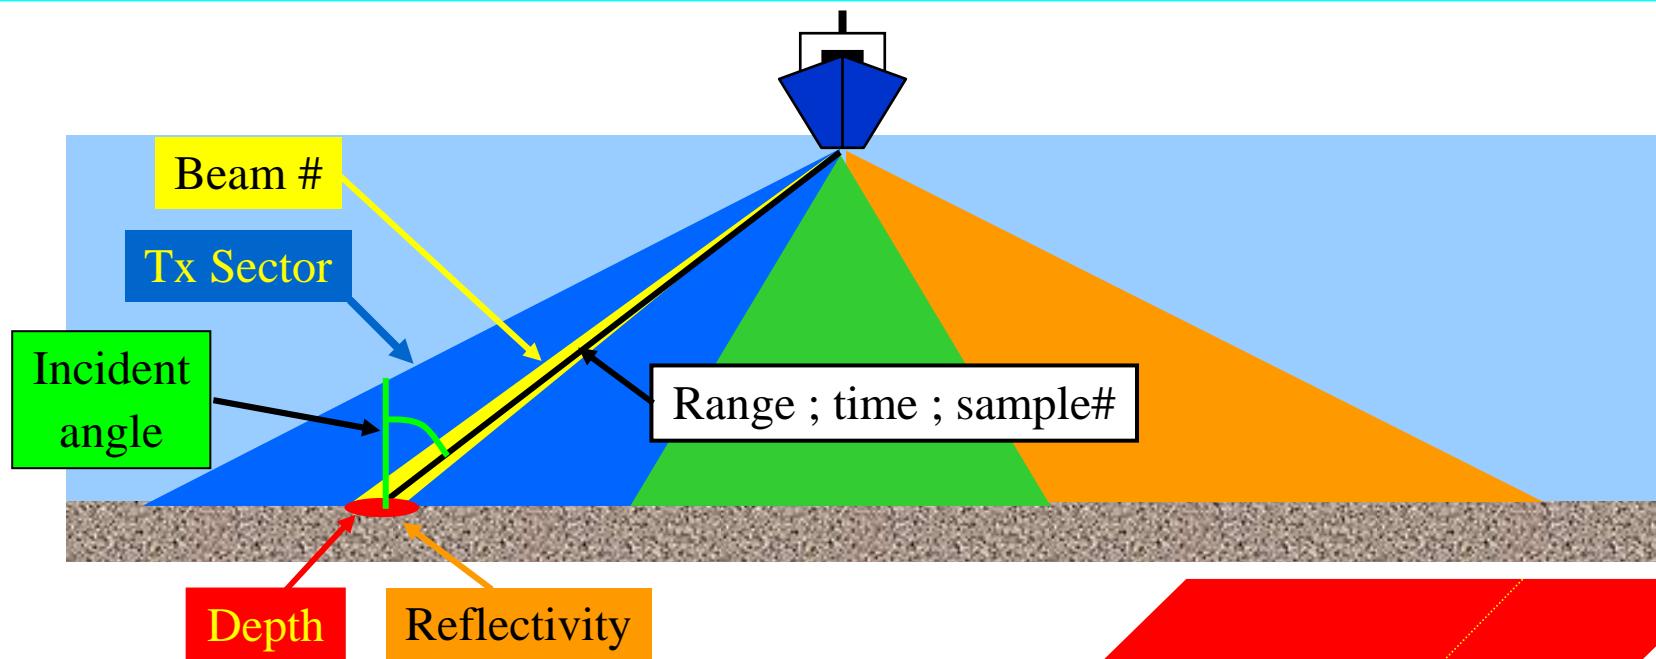

SonarScope : Principal or complementary tool

SonarScope : Tree domains of application

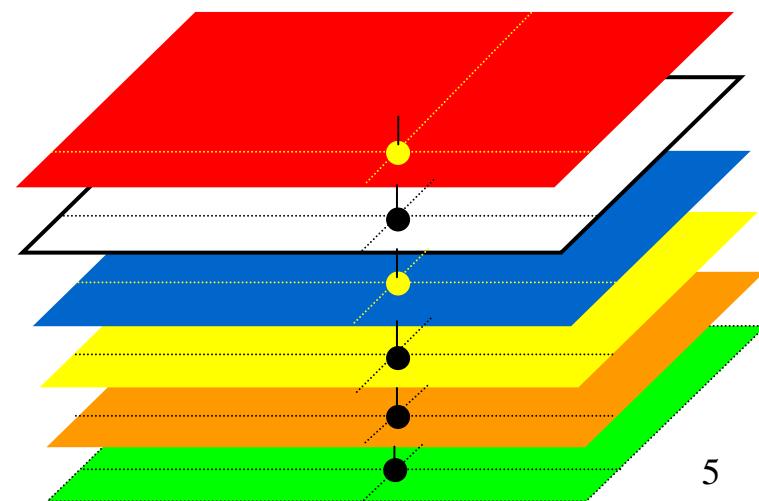

- Quality control
- Data processing
- Help for interpretation

SonarScope : Multilayer data

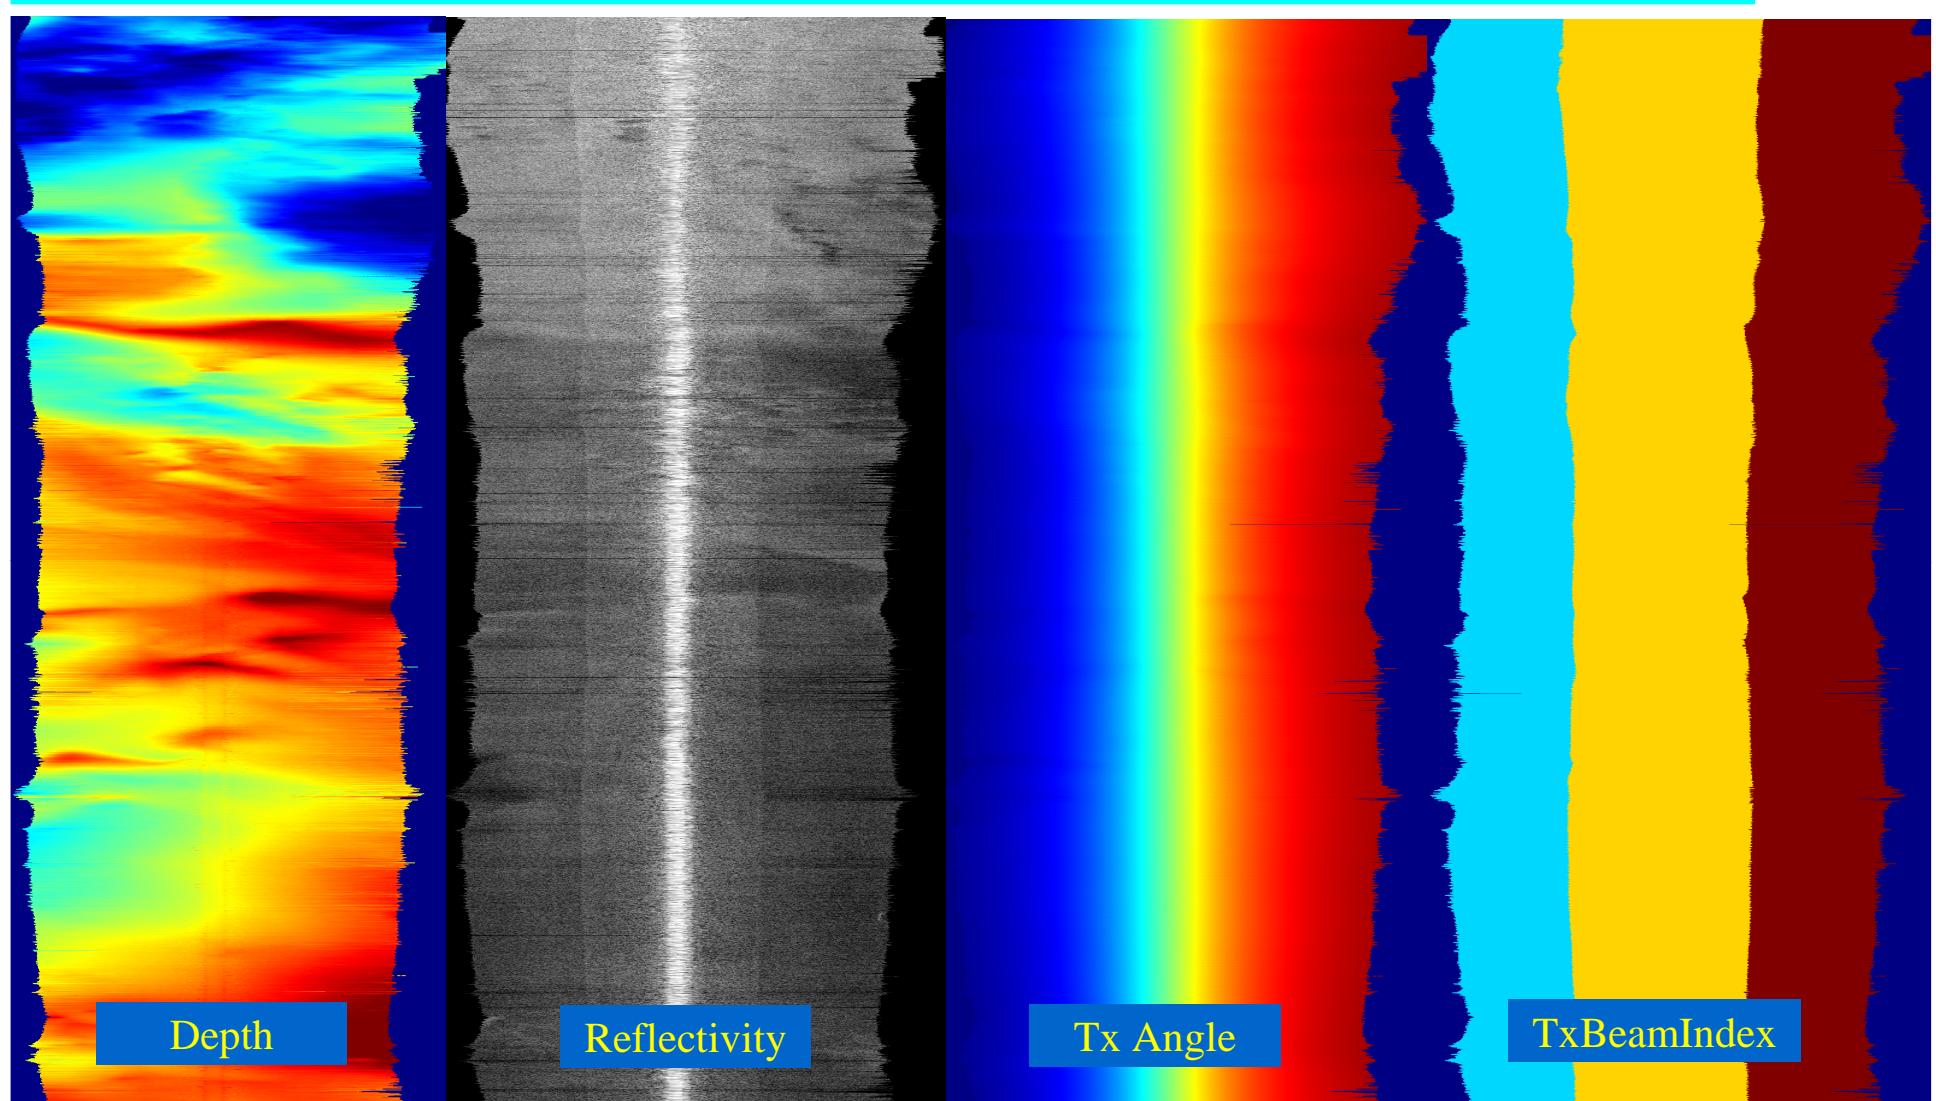

And also (e.g.) :

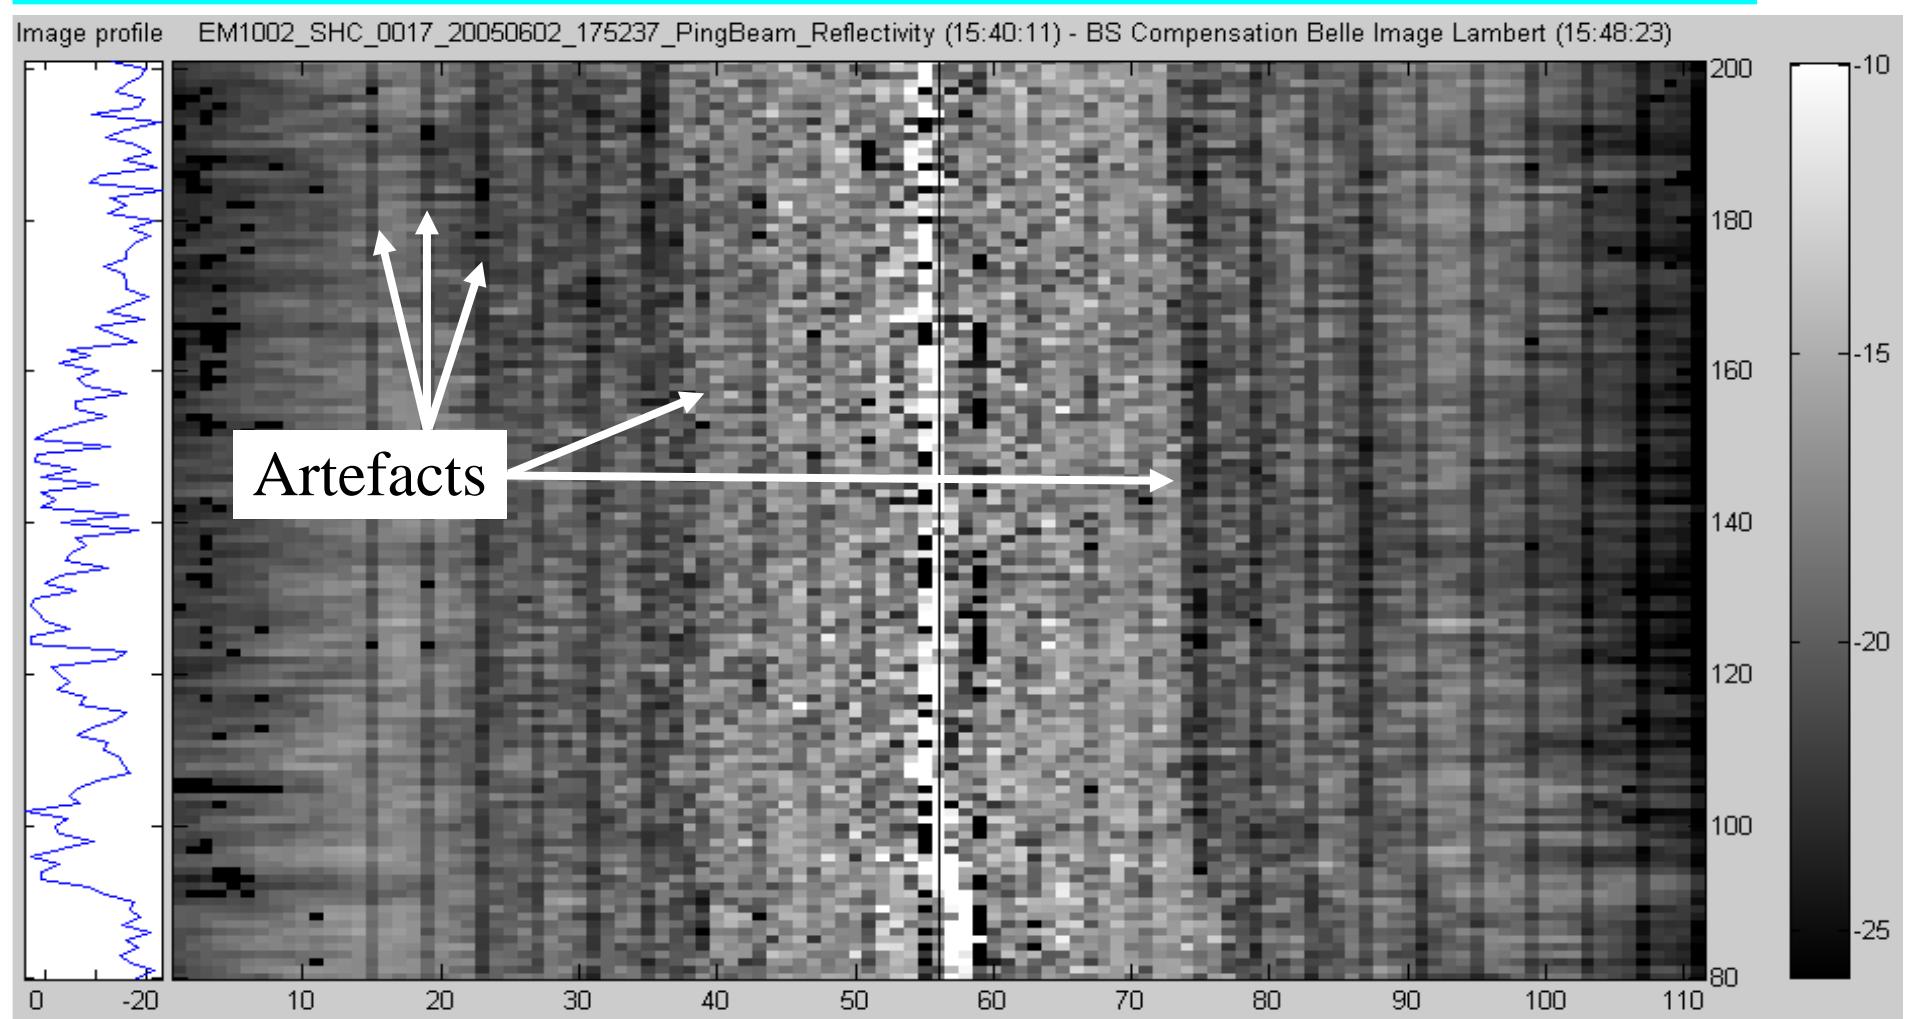

- Detection type (amplitude/phase)
- Transmit angle
- Mode, roll, pitch, heave...
- Etc.

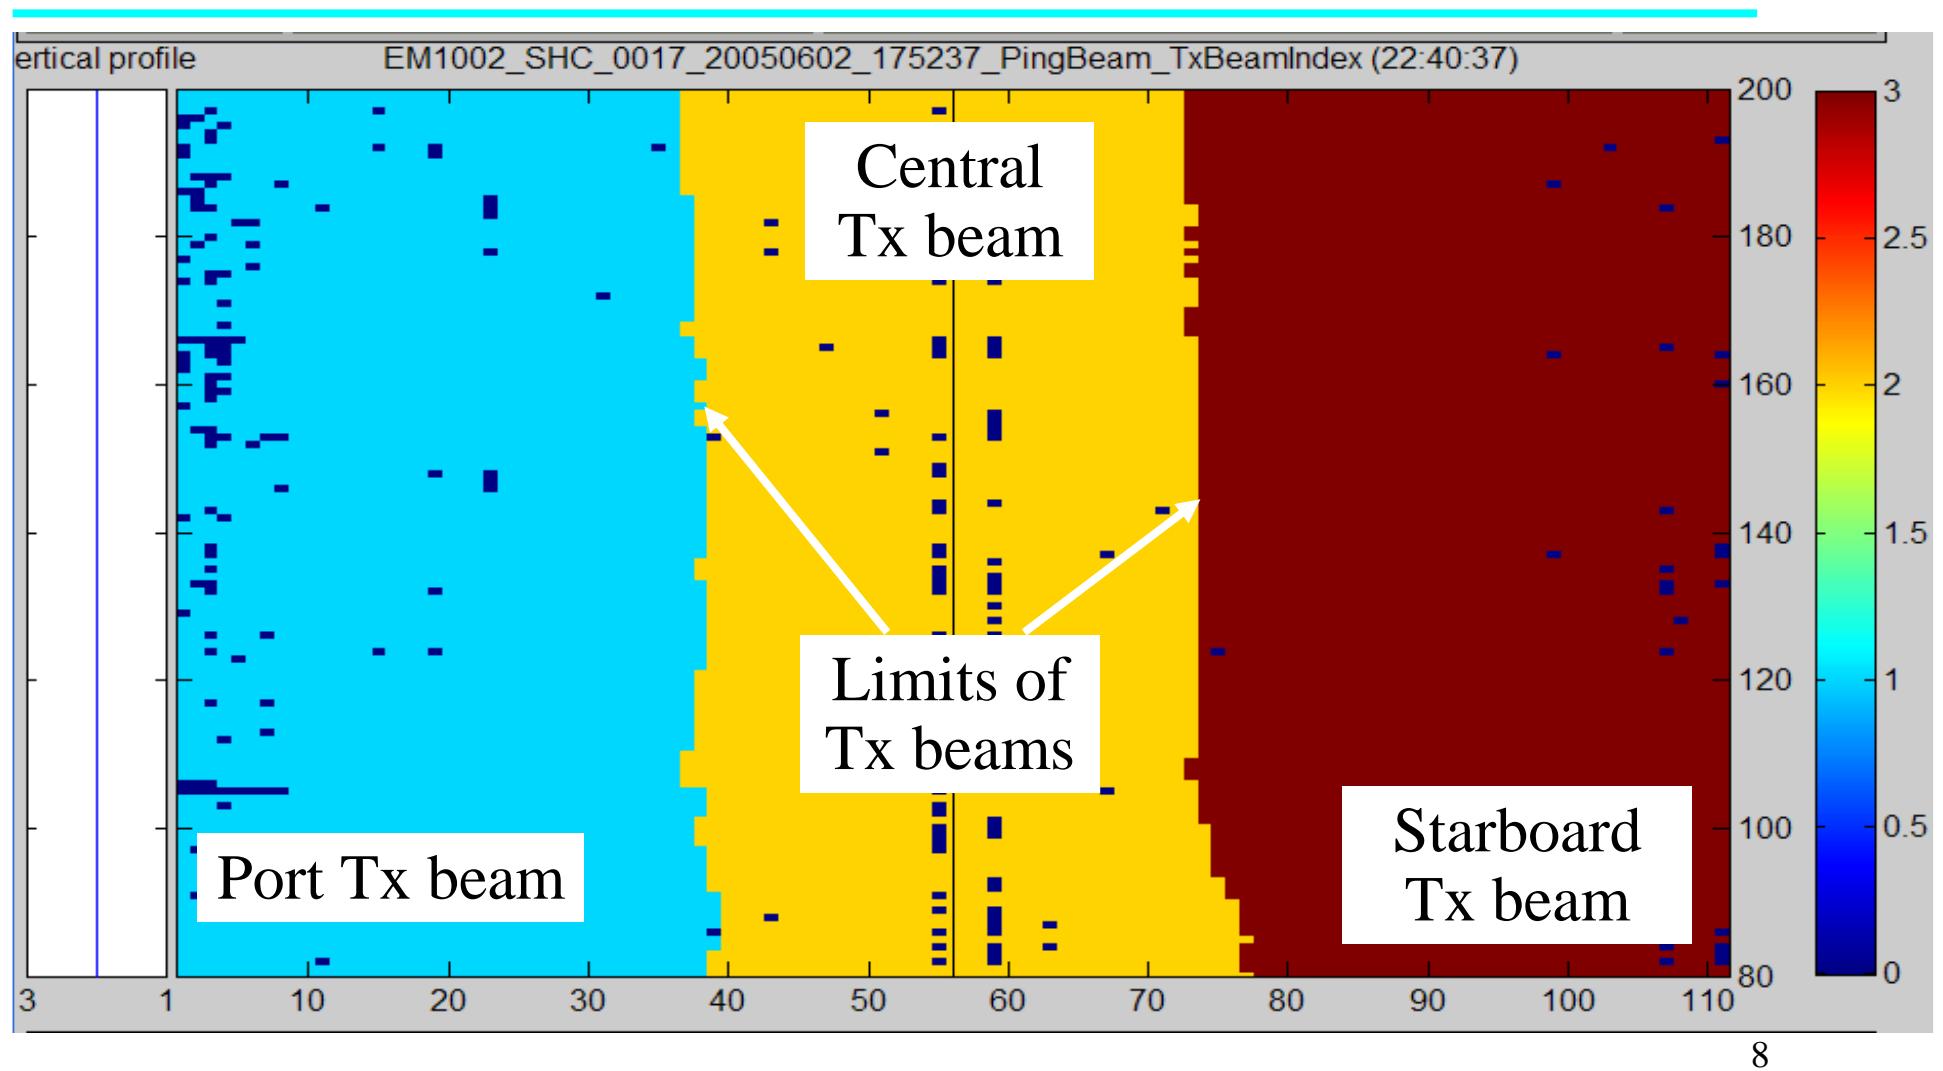

SonarScope : Example of multilayer data

SonarScope : Quality Control

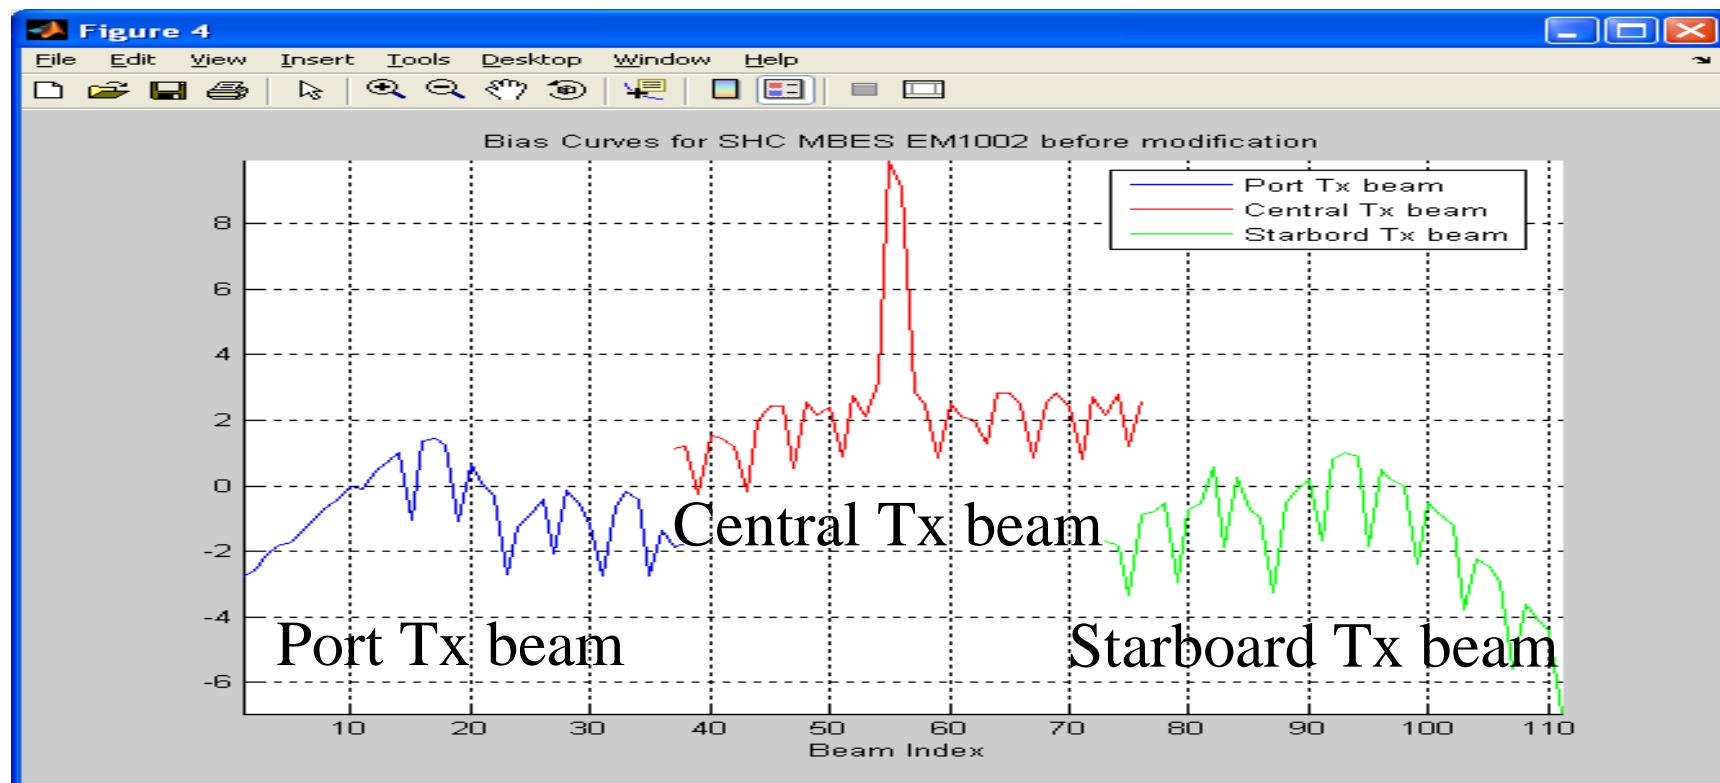

SonarScope : Quality Control

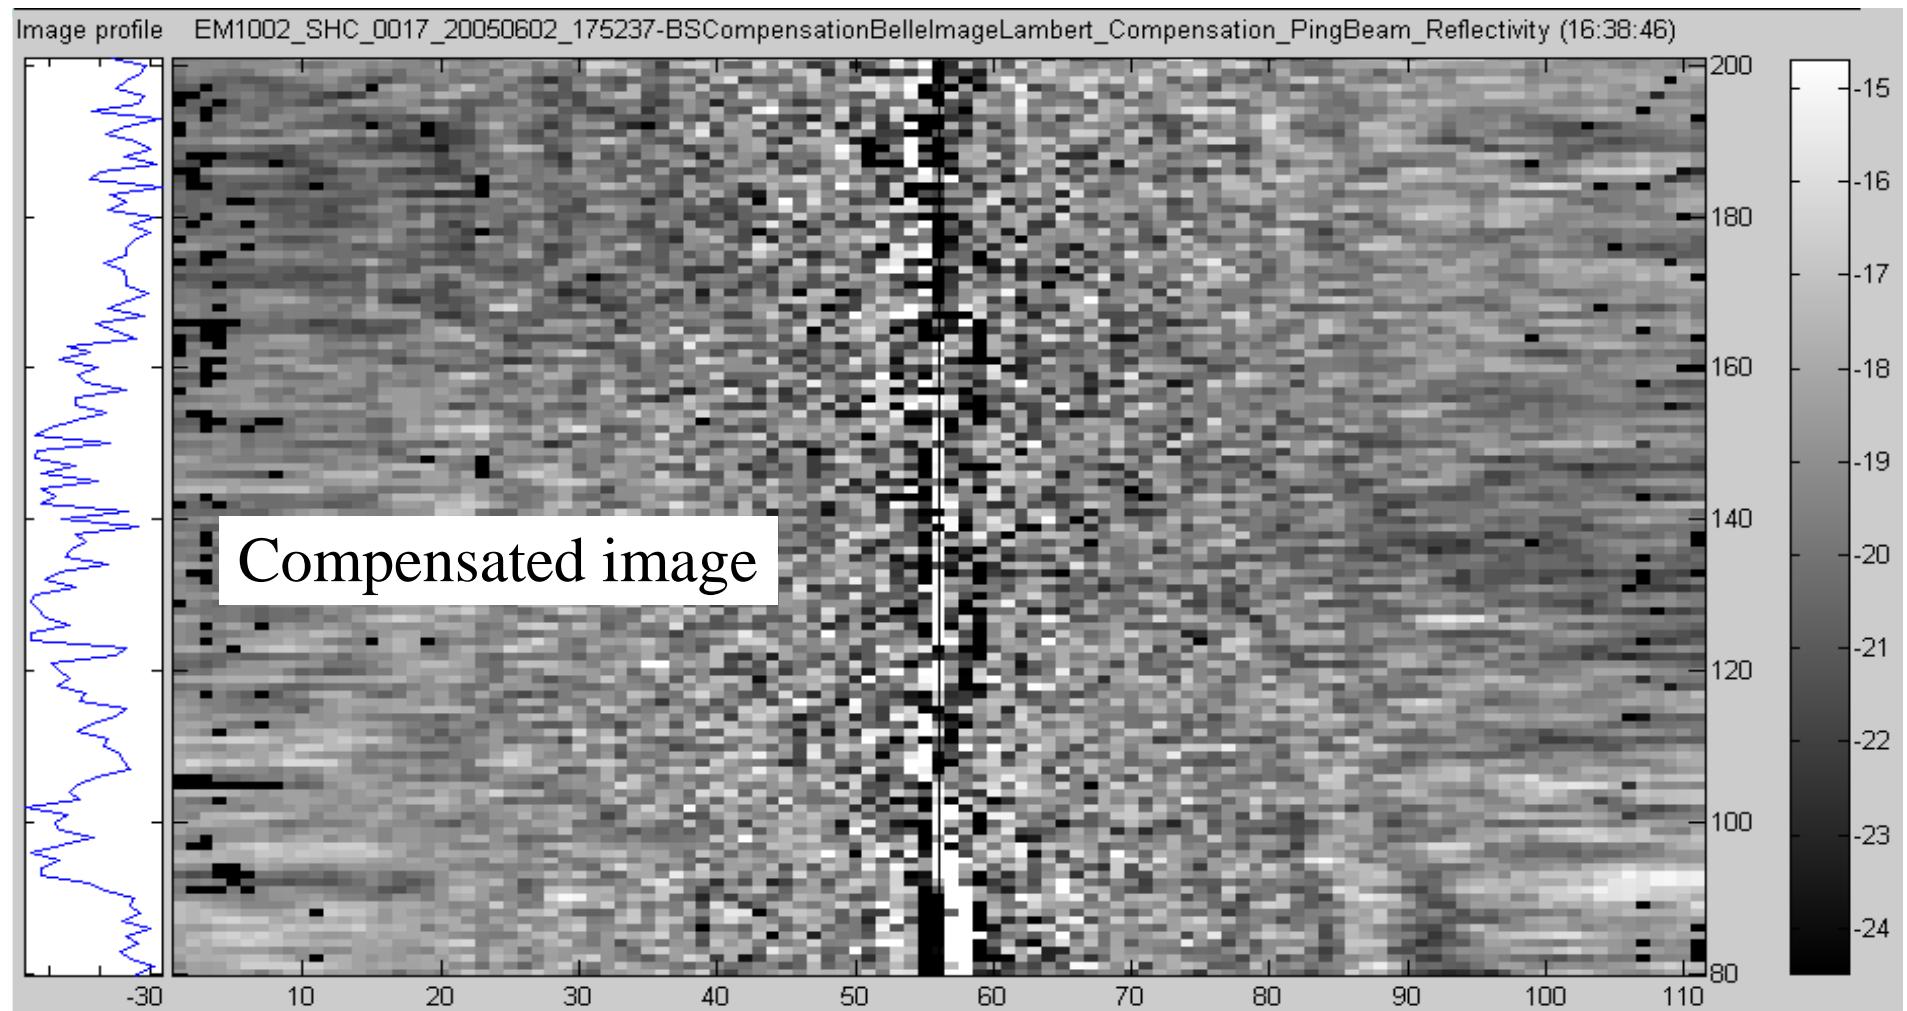

SonarScope : Quality Control

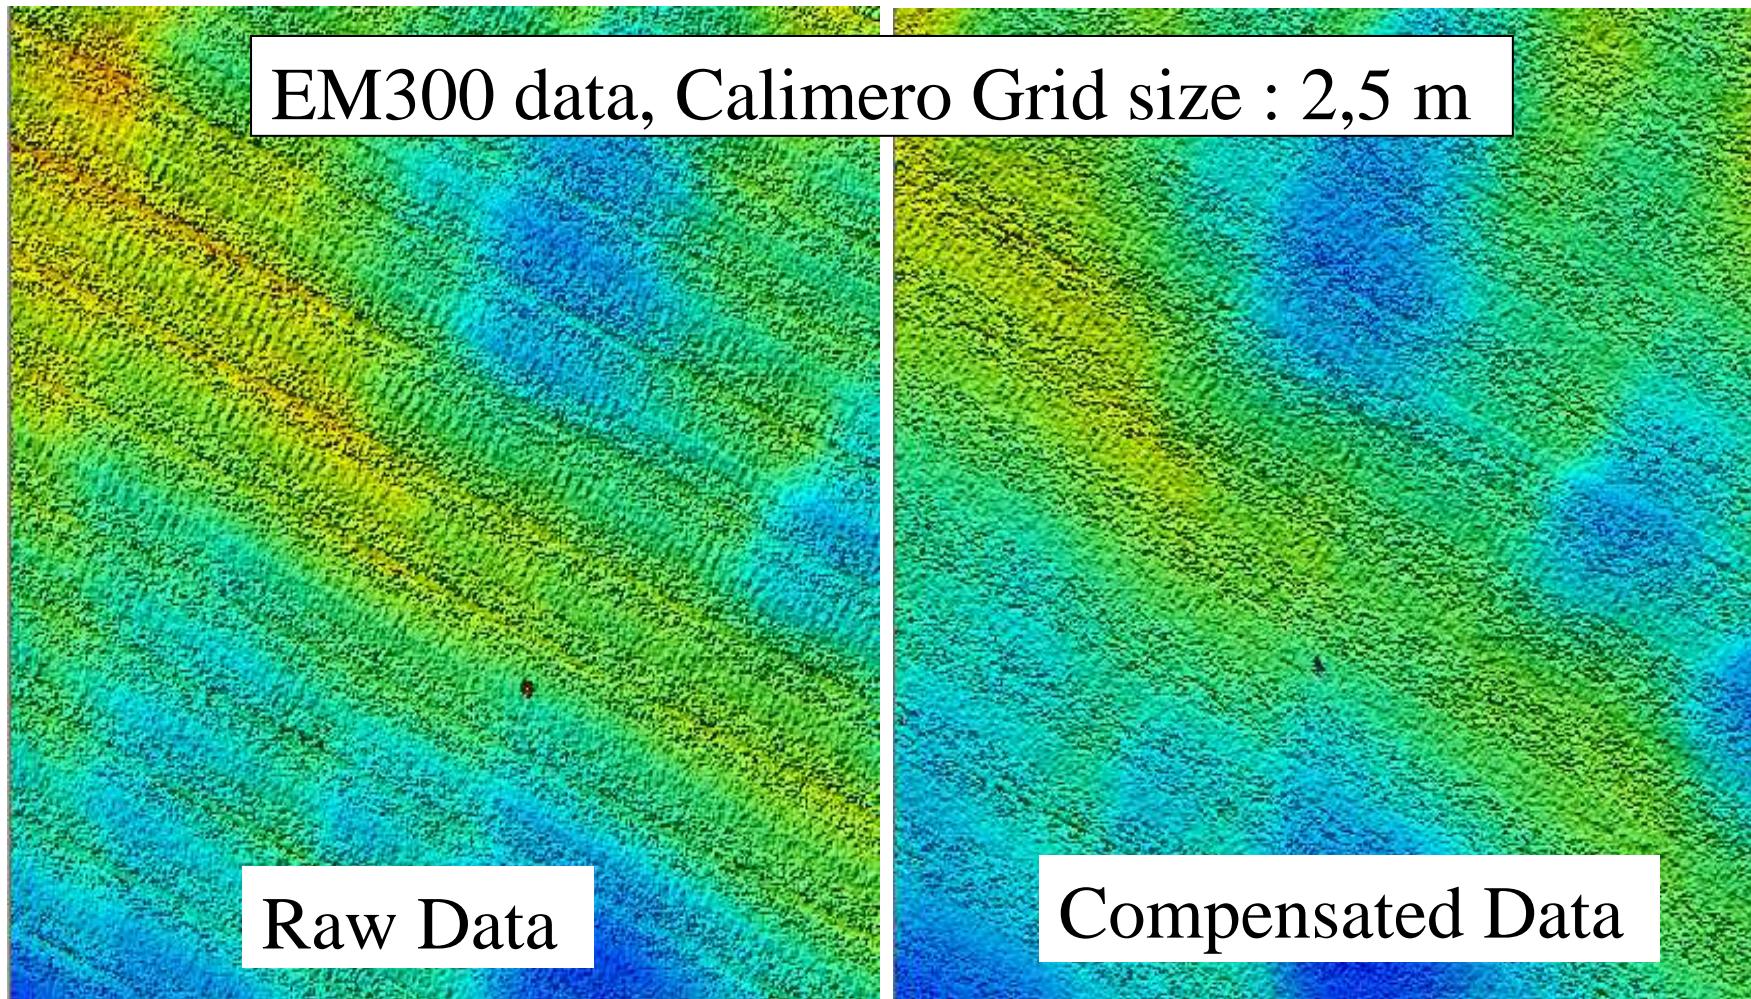

- Multi-layer statistics : mean of reflectivity vs Tx Angle grouped by Tx sectors

SonarScope : Quality Control

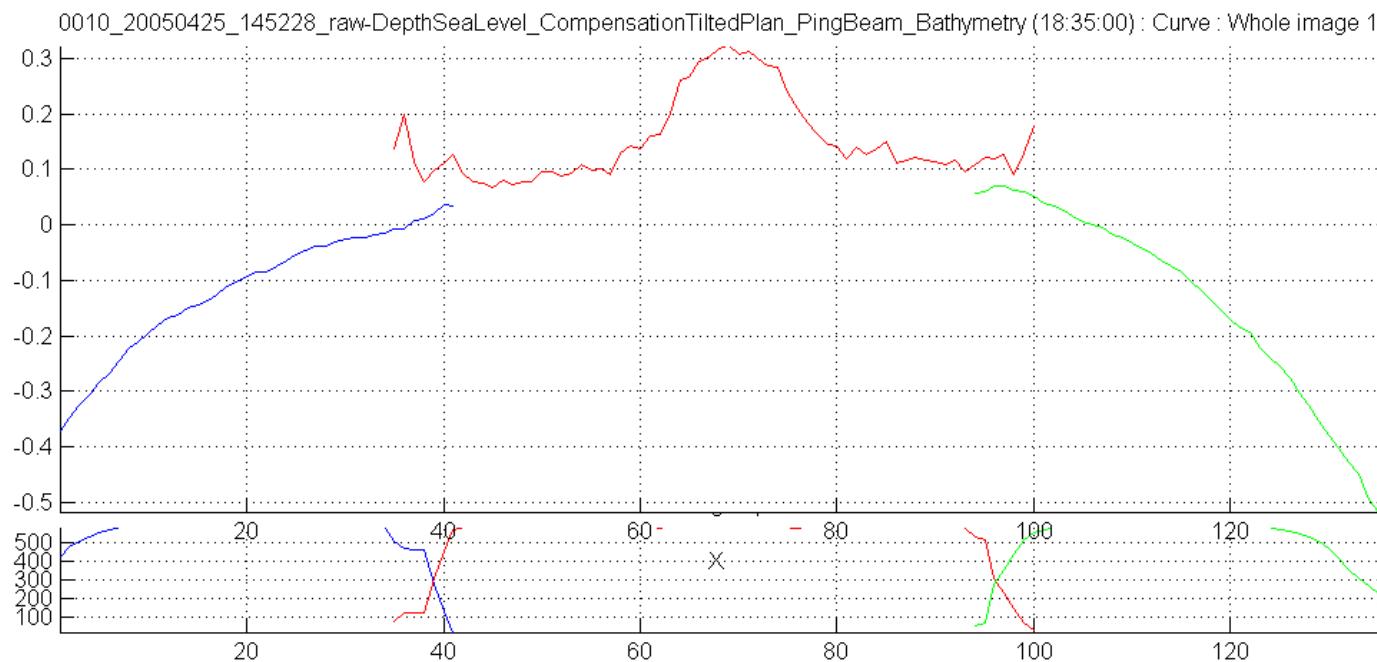

SonarScope : Quality Control

SonarScope : Quality Control

- Multi-layer statistics : Bathymetry minus tilted plan vs RxBeamIndex grouped by TxBeamIndex

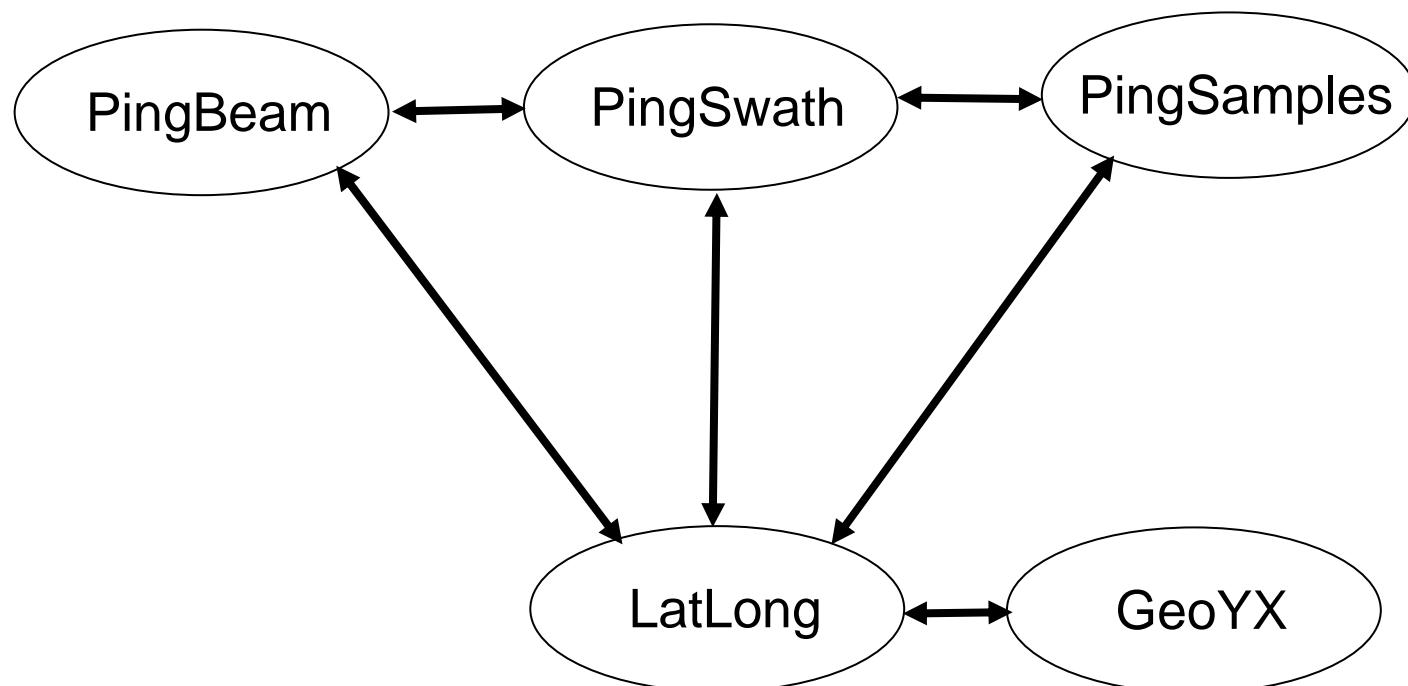

SonarScope : Data Processing

- An abstraction model for all MBES and Sidescan sonars
 - Transmission beams
 - Reception beams
 - BS
 - TVG, NE, Insonified Area, etc ...
- An abstraction model for sonar data
 - Geometry
 - Data information

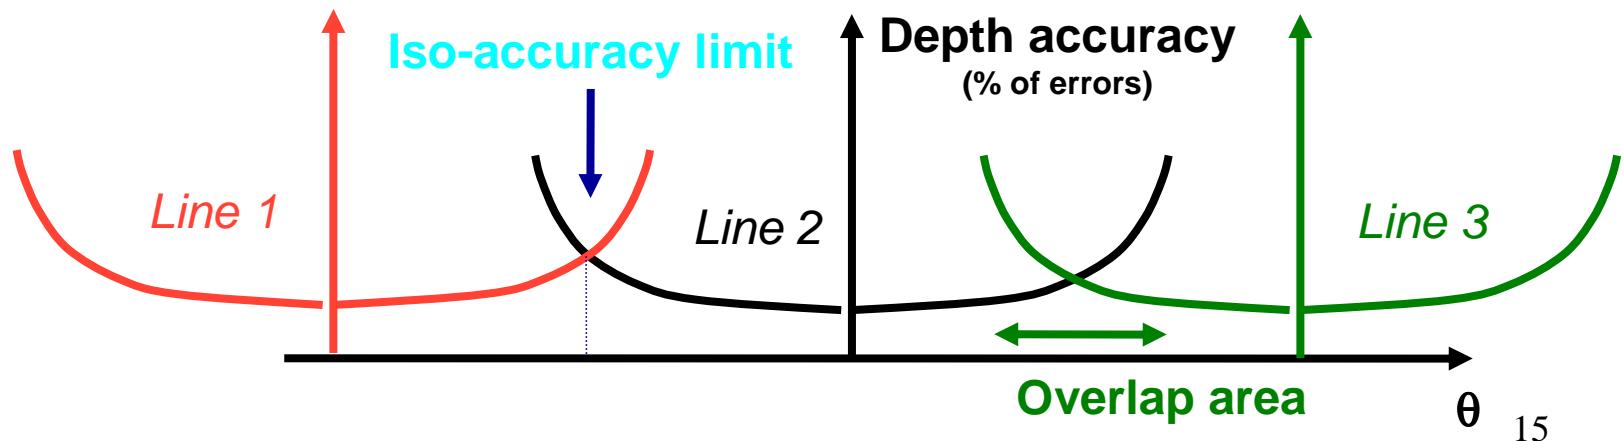

SonarScope : Data Processing

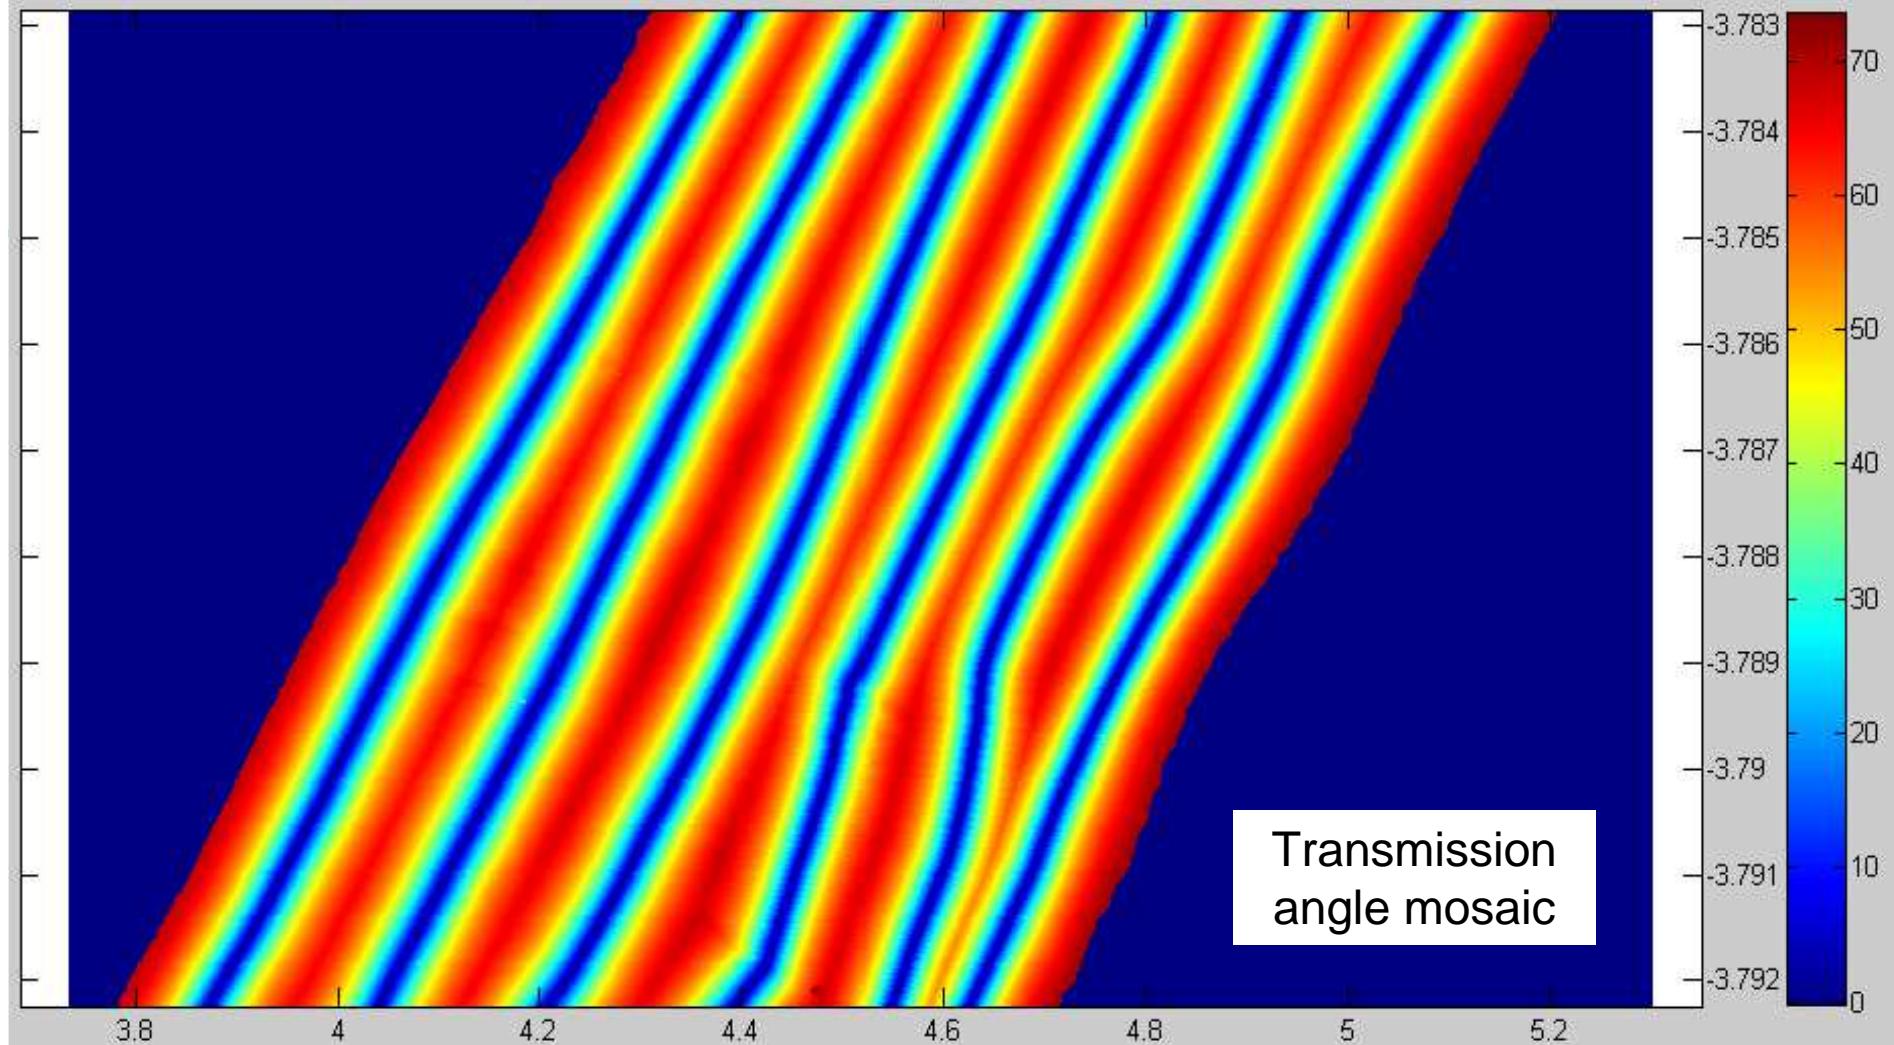

- All geometry transformations

SonarScope : Swath overlap processing

- Each swath line is a mosaic image
- The Tx angle is « mosaicked »
- A pixel replaces another one only if the absolute value of its transmission angle is lower than the resident pixel : lines are separated by the iso-accuracy limit

SonarScope : Help for Interpretation

- Multiple format exportation, Free viewers, WMS data importation
- Statistic compensations
- Calibration
- Signal processing
 - Speckle filtering
 - Texture analysis & segmentation
 - BS model
 - Sand ripples analysis

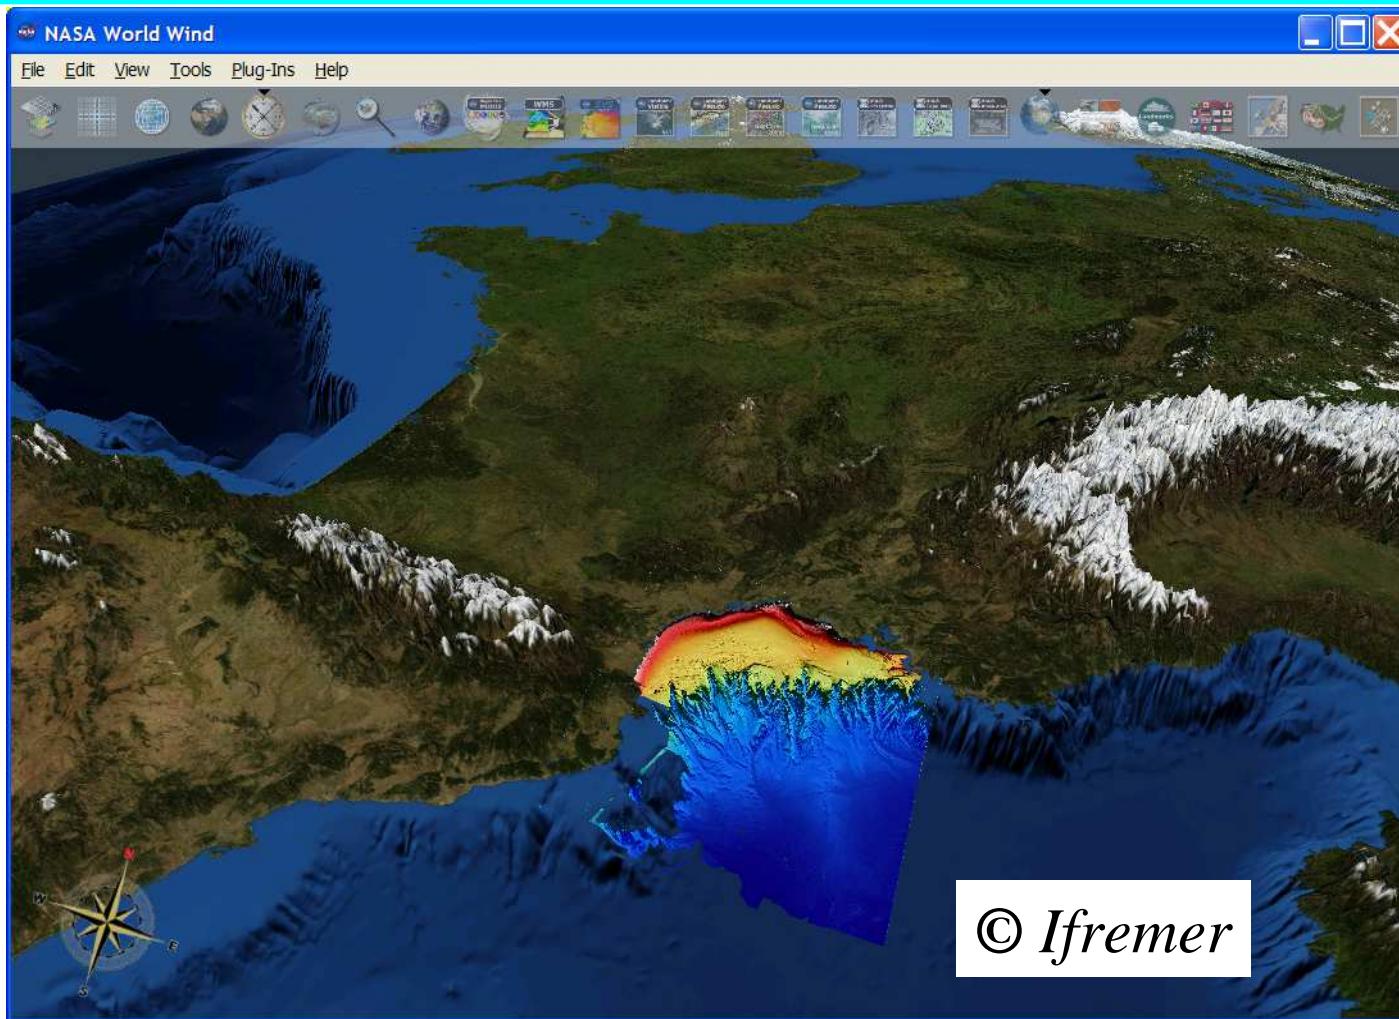

SonarScope : Multiple input/output data formats

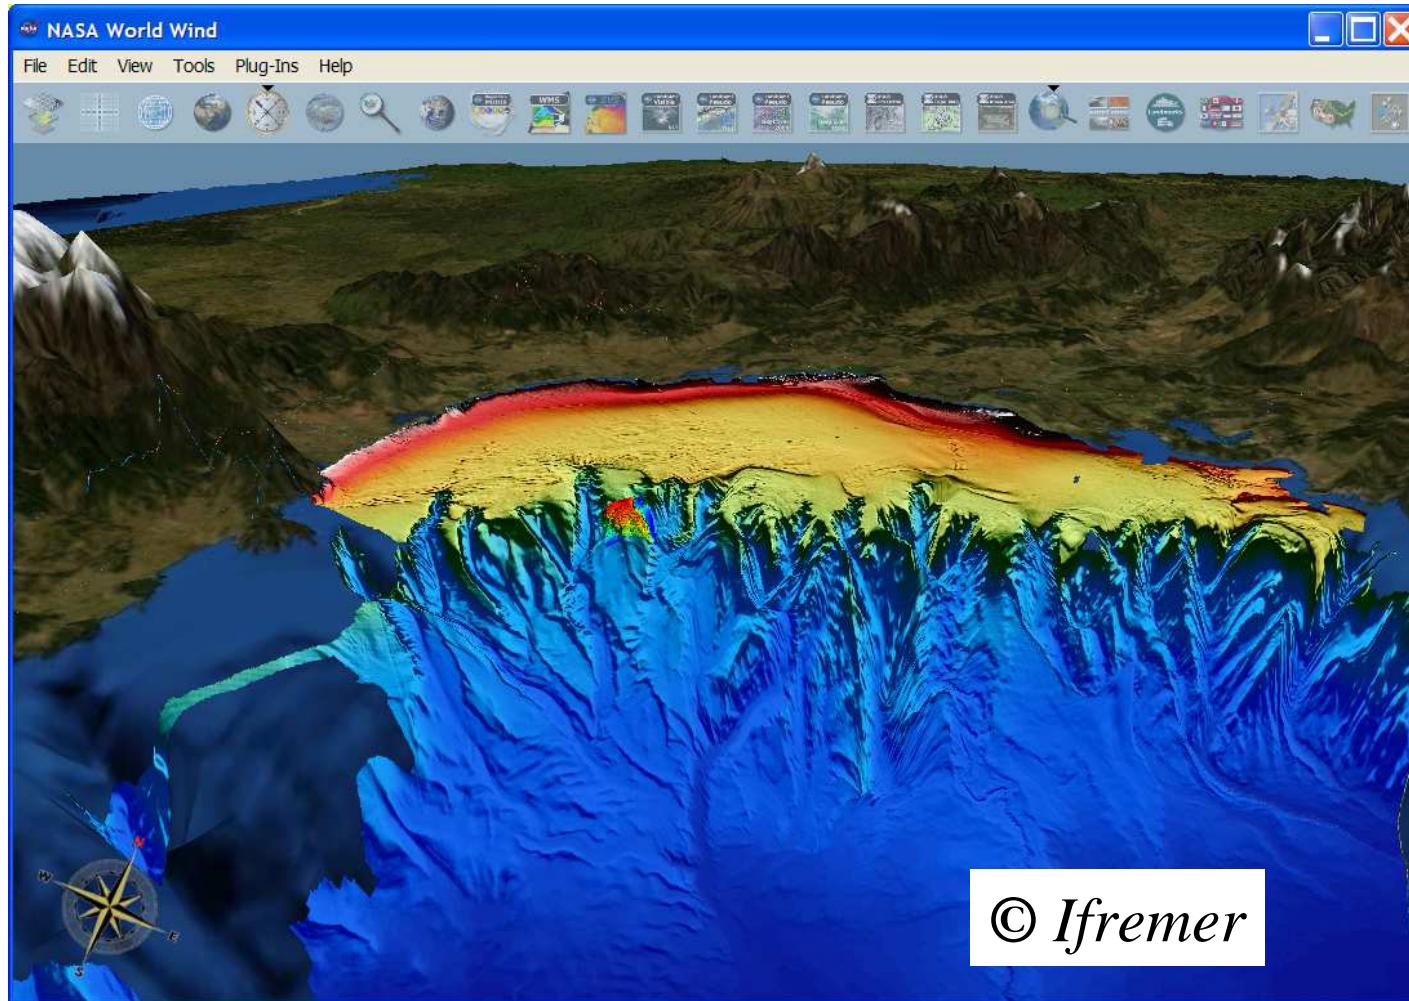

SonarScope : GoogleEarth format

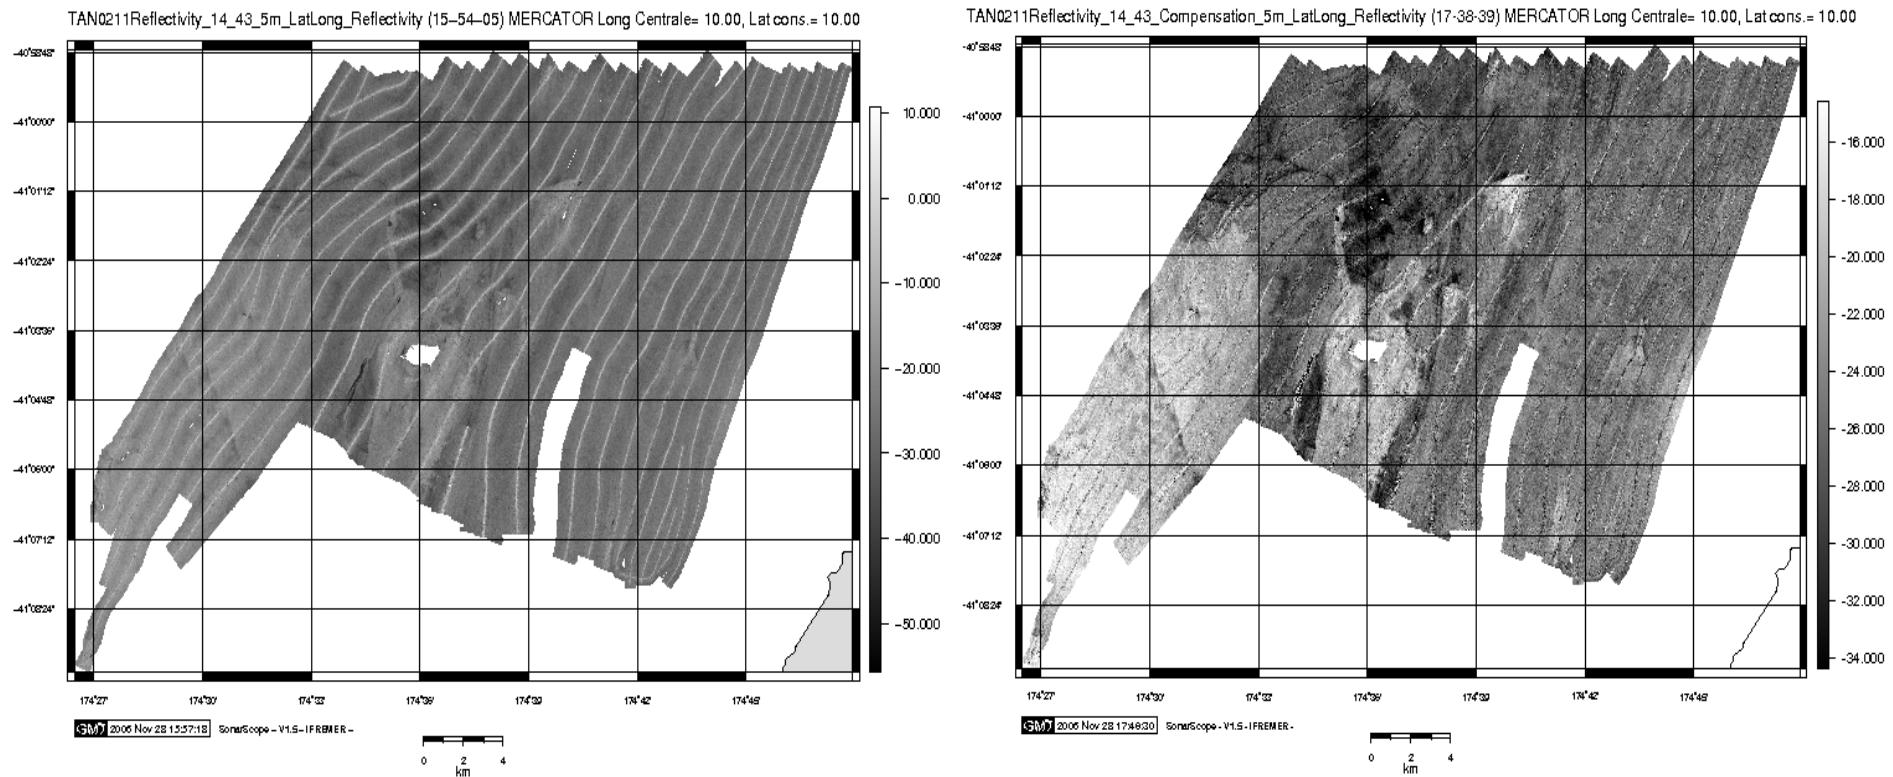

SonarScope : NasaWorldWind format

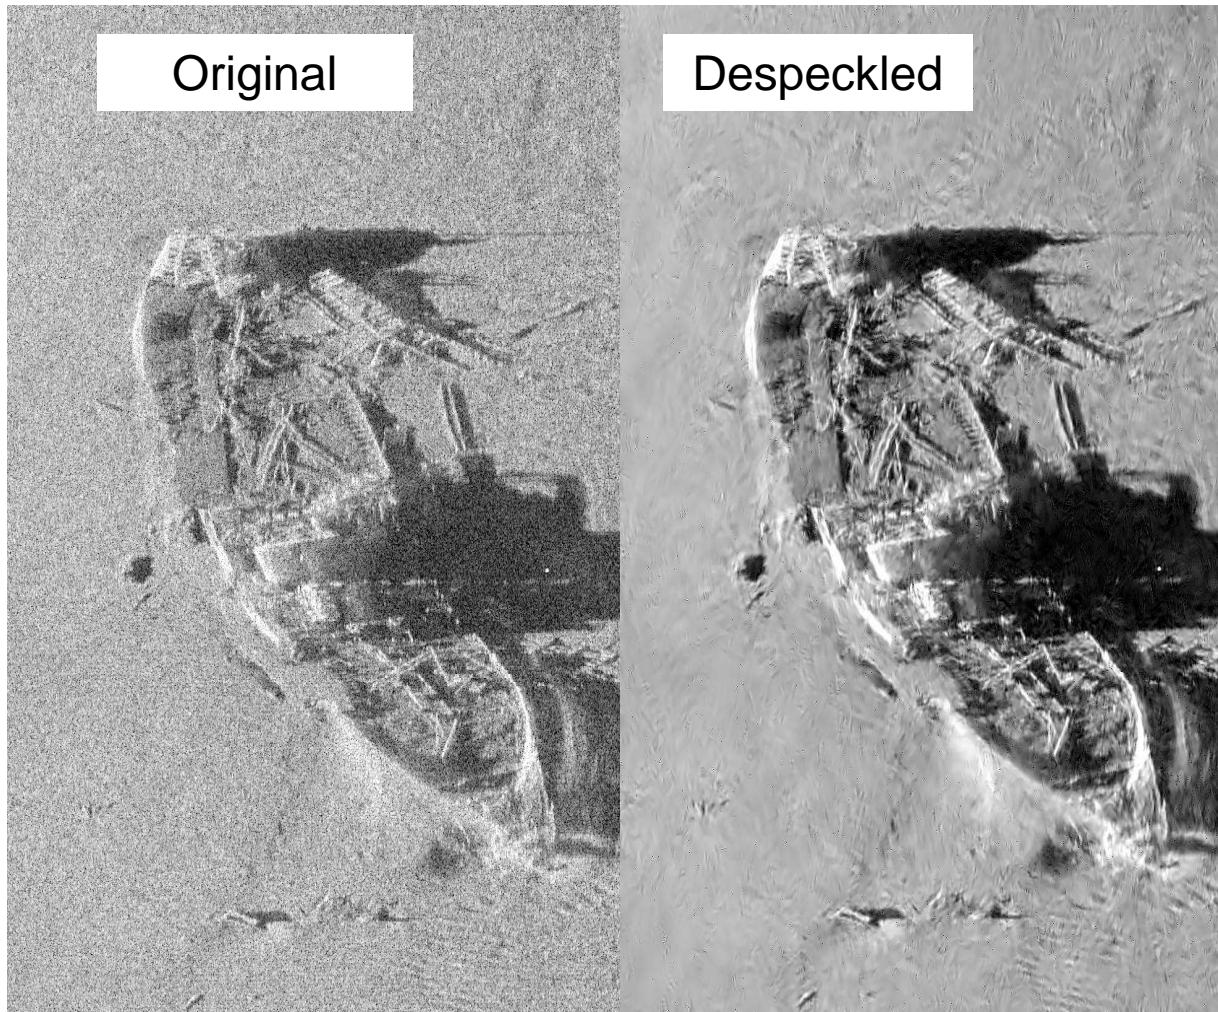

SonarScope : NasaWorldWind format

SonarScope : Statistic compensation

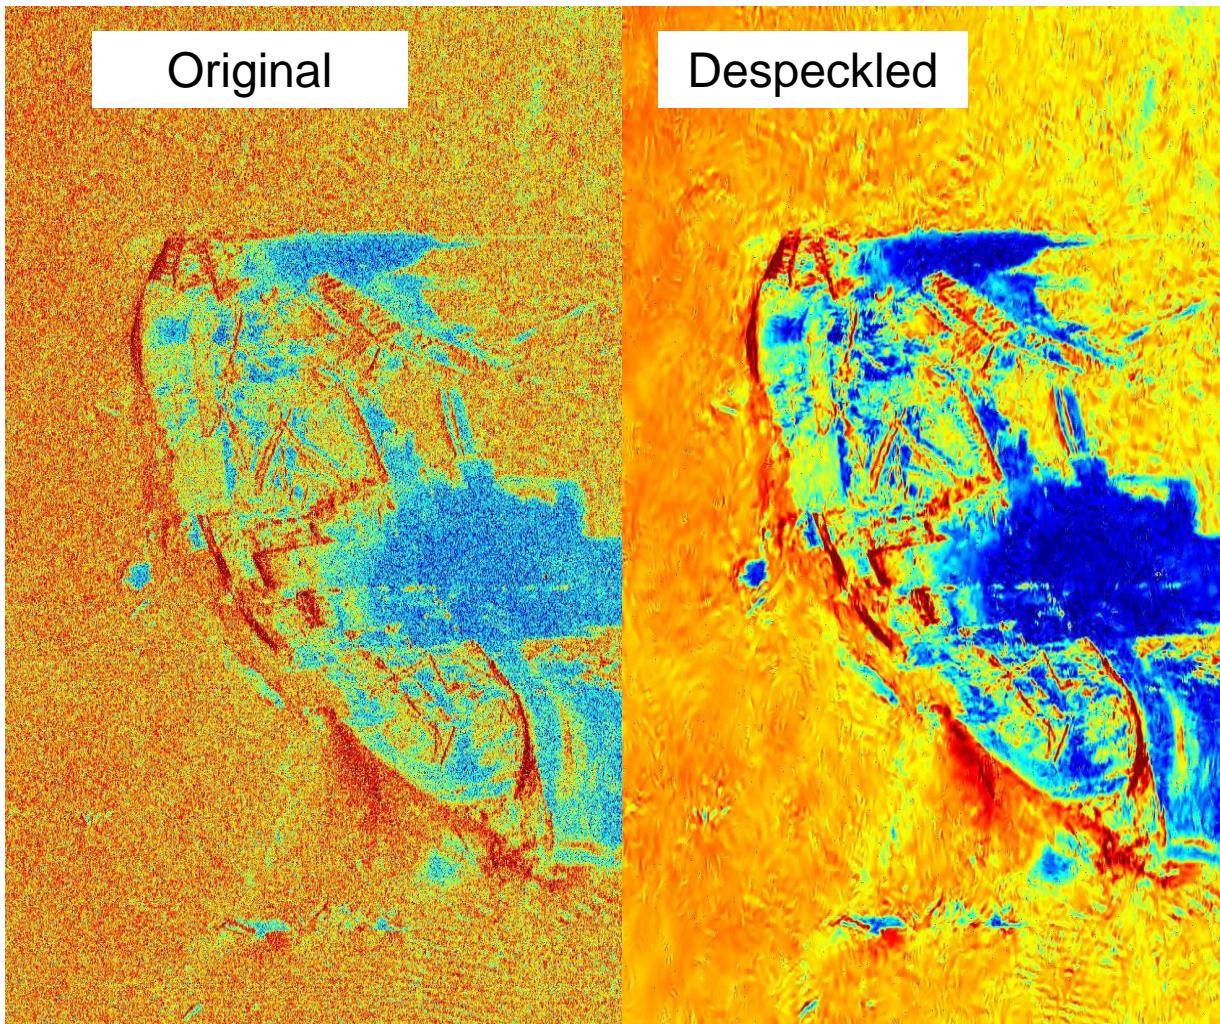

SonarScope : Speckle filtering

Segmentation sans
dépendance angulaire

Segmentation avec
dépendance angulaire 34

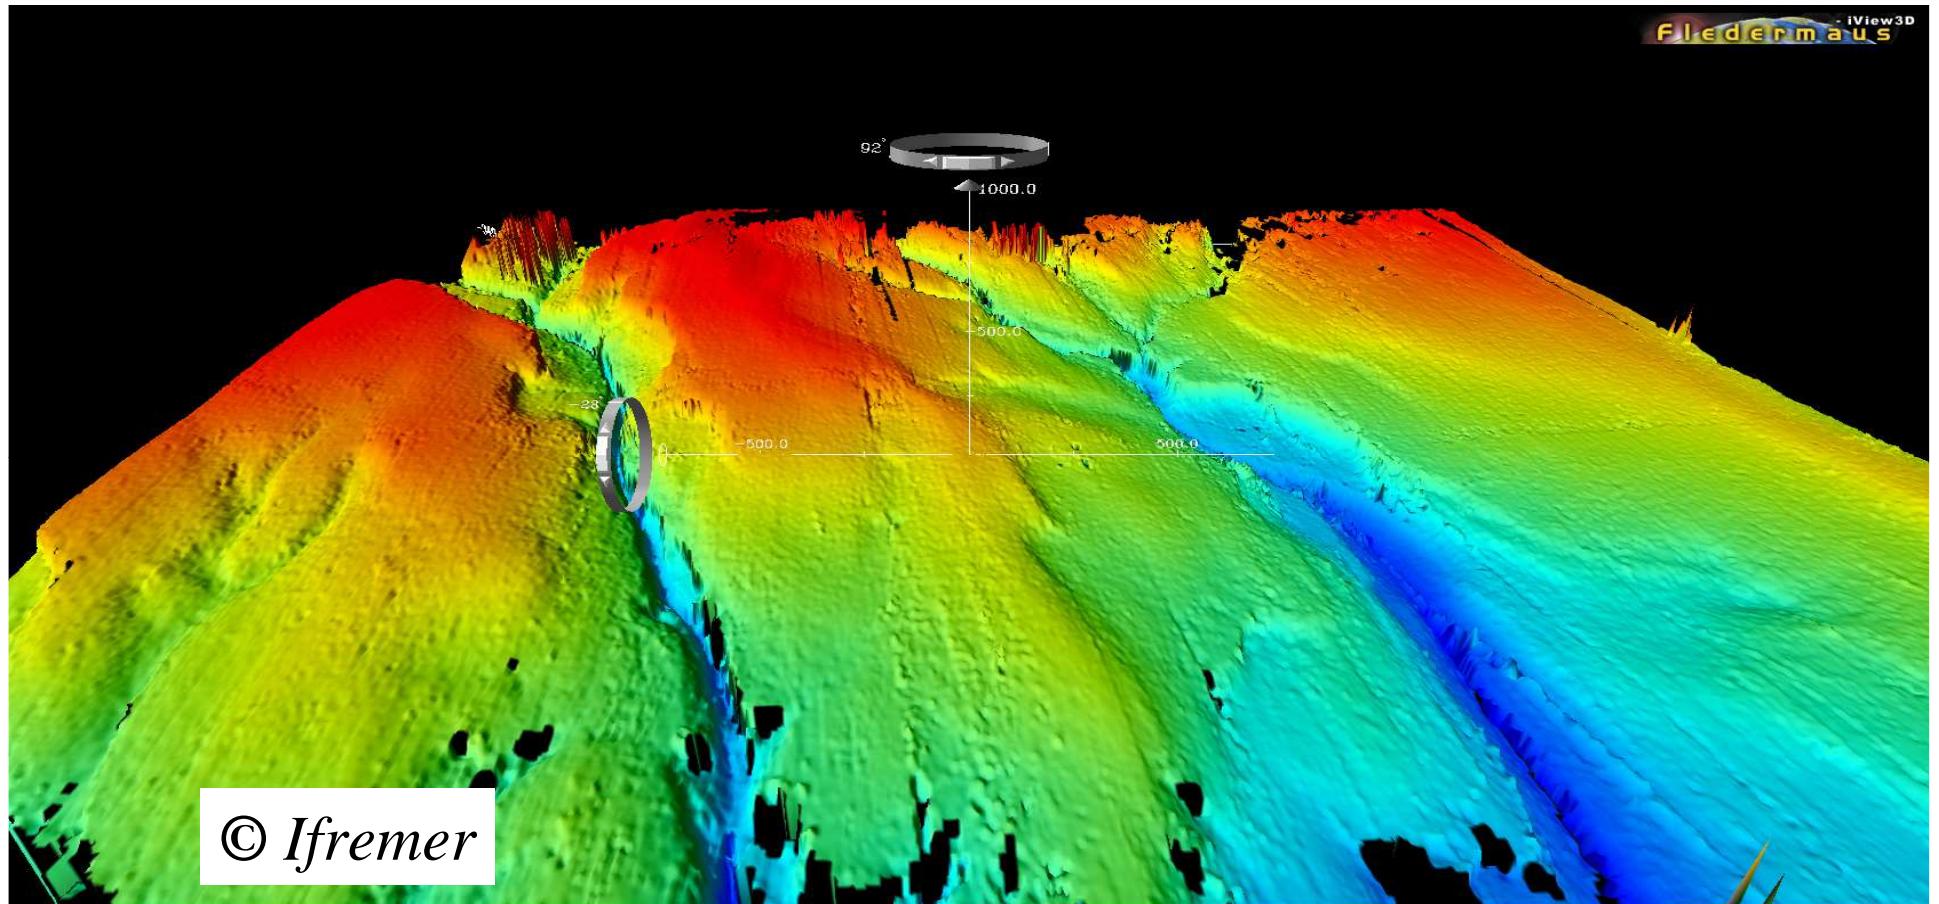

SonarScope : Reson-SAT2

- Reson 7150 24 kHz bathymetry : a forest of artefacts

SonarScope : Reson-SAT2

- Reson 7150 24 kHz bathymetry after a preliminary spike remover

SonarScope : External diffusion

- 2005-2006 : partnership agreements with
 - NIWA (New-Zealand)
 - CHS (Canada)
 - CIDCO (Canada)
 - SHOM (France)
 - ENST (France)
- 2007 : commercial product
